

CORE MISSION Zero Pet Casualties	PRIMARY AI ENGINE Gigalogy MAIRA RAG	VISION BIOMETRICS Qwen2.5-VL-72B	BUSINESS MODEL Care-to-Commerce	TARGET ARR (Y3) ৳22.9 Cr (~\$1.9M)
-------------------------------------	---	-------------------------------------	------------------------------------	---------------------------------------

01 THE CRITICAL PROBLEM

 **Midnight Medical Panic:** 2 AM toxic ingestions (chocolate, lilies, paracetamol) lead to fatal delays. Generic LLMs hallucinate dangerous dosages.

 **Untracked Lost Pets:** Text descriptions on social media fail in dense cities. Finding a wandering animal is impossible without visual biometrics.

 **Counterfeit Food Epidemic:** 40%+ of open-market pet food is fake or expired, while finding clinics with 24/7 ICU or surgery is chaotic.

02 THE SOLUTION: 4 AI INTELLIGENCE PILLARS

 **PawDoctor AI Triage** <2ms Guard
Deterministic poison fast-path (zero-hallucination math) + empathetic clinical triage (MAIRA Profile 0a8fd1e8).

 **Lost & Found Radar** 92% Match
Qwen2.5-VL-72B vision biometrics (facial mask, coat pattern, collar) + GPS proximity + 1-tap owner dialer.

 **Specialist Clinic Nav** 16 Hospitals
16 verified Dhaka hospitals tagged by 24/7 ICU, digital X-ray, orthopedic surgery, and avian care. Instant booking.

 **AI Nutrition & Commerce** Caloric Math
Clinical RER/MER caloric formulation + allergen exclusion matching genuine feeds (Royal Canin, Taste of the Wild).

03 ENTERPRISE FULL-STACK & AI TOPOLOGY
